This filing explains two entries in the July 15 Quarterly Report ending on 6/30/14. A recent internal review was conducted to explain why the ASLRRRA-PAC bank account had a balance \$1,251.08 more than shown on FEC reports filed to date. This review showed that a contribution made to Continuing a Majority PAC, on August 2, 2012 had never been cashed. That disbursement is eliminated in this report with an adjusting entry.

We also found that at some point from March of 2012 to May of 2012 a contribution of \$250.00 was received and deposited but not otherwise recorded in conformity with normal ASLRRRA-PAC practices, nor disclosed on the FEC filing report. The identity of the contributor has not been successfully confirmed. We are combining that \$250 with a discrepancy of \$1.08 that appears between the bank balance and the FEC filing reports in 2010-2011. An adjusting entry in this report will bring the cash on hand in line with the actual cash on hand with respect to these two discrepancies.
